Experience

Radush pvt ltd May 2023 - July 2024

- Developed an automation web application to streamline the placement process for colleges.
- Designed the UI structure for various dashboards (Client, Admin, and Placement) using Microsoft PowerPoint.
- Created the UI for the onboarding process of companies on the placement dashboard and designed a detailed list of company information for the Admin dashboard.
- Developed a calendar UI integrated across all dashboards to display past and upcoming placement events with relevant details.
- Collaborated on building an e-commerce platform, focusing on innovative QR products tailored for the local market.
- Designed and implemented the UI for various pages, including About Us, Franchise Enquiry, Social Responsibility, FAQ, Contact Us, and a political map with product icons placed at designated locations.
- Authored comprehensive technical documentation for the project.
- Gathered data on agents from Africa and the UK for the QR platform.
- Assisted in migrating the company's website from WordPress to React by developing a static version of the website.

Side Projects

- Developed an application called Fact Flow utilizing React and Supabase.
- The platform enables users to contribute facts by creating entries, categorizing them appropriately, and providing a source link to verify the information.
- Upon submission, the facts are categorized, allowing users to view and explore them within their respective categories, along with related facts from other contributors.
